## MEMORANDUM

To: Greg Switenky, CAO

From: Lee Penner

Date: May 3, 2017

Re: Downtown Park final Concept

---

Background: The Down Town Park subcommittee of the beautification committee was once again tasked with completion of the downtown park final east wall. \$15,000.00 was approved in the capital budget for 2017.

East Wall: The downtown committee met in early January and decided that more plant material and a greener feel for the park was still most important. They decided to try to develop a living wall. The Building owner was then contacted, and agreed that she would accept the idea on her building. In ground planters would be necessary in front of the wall to make sure the Virginia Creeper would not winter kill. Pictures of some of these famous walls show what it would like in all seasons. It is estimated that the wall would take approx. 6 years for the plant material to substantially cover the space.

The following pictures of some of these famous walls show what it would like in all seasons.

Jimmies Hardware Sign:

Dave's woodworking is continuing to investigate a lighted neon hammer sign for the Jimmies Hardware store front.
